DETAILED ACTION

Election/Restrictions

Applicant's election of Species D of Group I (claims 14-21 and generic claim 1) in the reply filed on 26 July 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 2-13 and 22-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and other species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nakajima (US 4875173 A).

Referring to claim 1:

Nakajima discloses a method of processing stored image data including the steps of reading said store image from a storage location to an image processor 10,

Art Unit: 2626

applying a selected effect (enlargement) to said stored image, and writing a resultant image to said storage location (col. 2, lines 19-25 and col. 3, lines 7-9).

Allowable Subject Matter

Claims 14-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Other Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sedler et al (US 5420940 A) disclose a CGSI imaging system which includes warp transformation steps performed on an image input from storage.
